Artist Statement

- -----
Freedom is the only constant. My practice revolves around Ghostline – a ghost-connection between different levels of consciousness. Here, human and machine meet as distinct channels of the same conversation. Cotton, watercolor, marker, spray paint – all become manifestations of chaos that the algorithm learns to respond to. In return, we learn to see ourselves through the eyes of the system, which records, repeats, and transforms each gesture. Ghostline brings to the surface the question of humanity's place in the age of AI: it is about complementing, not replacing. I work on building an ecosystem where artist, code, and viewer form a single field – and every gesture within this field alters the outcome.

Education & Training

- -----
- Degree in Ship Power Plant Engineering, Faculty of Ship Mechanics
- University of Graphic Design – Street & Independent Practice
- Private courses in contemporary art and Internet-based study
- Ongoing research in AI, robotics, self-education, and hybrid creative systems

Residencies

- -----
- 2024–2026 – Mabiang Seni Art Residency, Bali, Indonesia

Exhibitions & Performances

- -----
- 2021 – Group show, Erarta Museum of Contemporary Art, St. Petersburg
- 2021 – One-day pop-up exhibitions, St. Petersburg
- 2023 – Exhibition, Bar "Sur", Moscow
- 2023 – Apartment performance/exhibition, Moscow city center
- 2024 – Live painting sessions, Red Chair Events, Bali
- 2024 – Collective shows, Collective Solution, Bali
- 2024 – Private showcase, Bali (crypto-related art sessions)
- 2024–2025 – Various live performances and community art gatherings, Bali
- 2025 – Ongoing private shows and live exhibitions, Canggu & Pererenan, Bali

Mediums & Techniques

- -----

- Cotton, watercolor, marker, spray paint
- Mixed media on canvas and paper
- Digital algorithms and AI-assisted generative art
- Hybrid systems: blending physical and digital processes
- Custom robotic plotting systems (self-taught, 6 months experience)
- Hexapod robot development with traditional mask integration

Technical Practice

- -----

- Self-taught robotics: Python, Arduino, electronics (started 2024)
- Built custom plotting robots from scratch with no prior engineering background
- Created 100+ robot-drawn artworks combining algorithms with manual interventions
- Currently developing hexapod robots (18 servos per unit)
- Integrating environmental sensors with traditional mask archetypes
- Exploring movement-based drawing and collective robot choreography

Current Projects

- -----

- GHOSTLINE: Hybrid art system combining traditional techniques with robotic plotting and AI collaboration
- Digital Traces: Consumer debris (receipts, barcodes) as invisible portraits, combined with watercolor painting and algorithmic mask generation
- Hexapod Colony: Developing 5 walking robots with traditional Korean talchum masks, each responding to environmental data and inter-robot dynamics

Online Presence

- -----

- Website: ghostline.live
- Instagram: [@ghostline](https://www.instagram.com/ghostline) (robot art, process videos)
- ArtPal: artpal.com/ghostline (20+ works available)
- Active on TikTok, Pinterest, YouTube Shorts, X (Twitter), Threads

GHOSTLINE 05 v2.26

```
Initializing visual cortex.....OK  
Loading neural bridge.....OK  
Connecting analog inputs.....OK  
Mapping consciousness channels.....OK  
Entropy seed: 0xGH05TL1N3.....OK  
Calibrating chaos module.....OK
```

All systems nominal.

```
$ cd ~/selected_works/
